

Git Onboarding — BIOL 4810

BIOL 4810

2026-02-26

Git Onboarding

You will:

- Create a GitHub account
- Configure Git locally
- Generate and install an SSH key
- Initialize a repository inside your existing `biol4810` folder
- Create a `.gitignore`
- Commit and push to GitHub

Step 0 — Create Your GitHub Account

If you do not already have one:

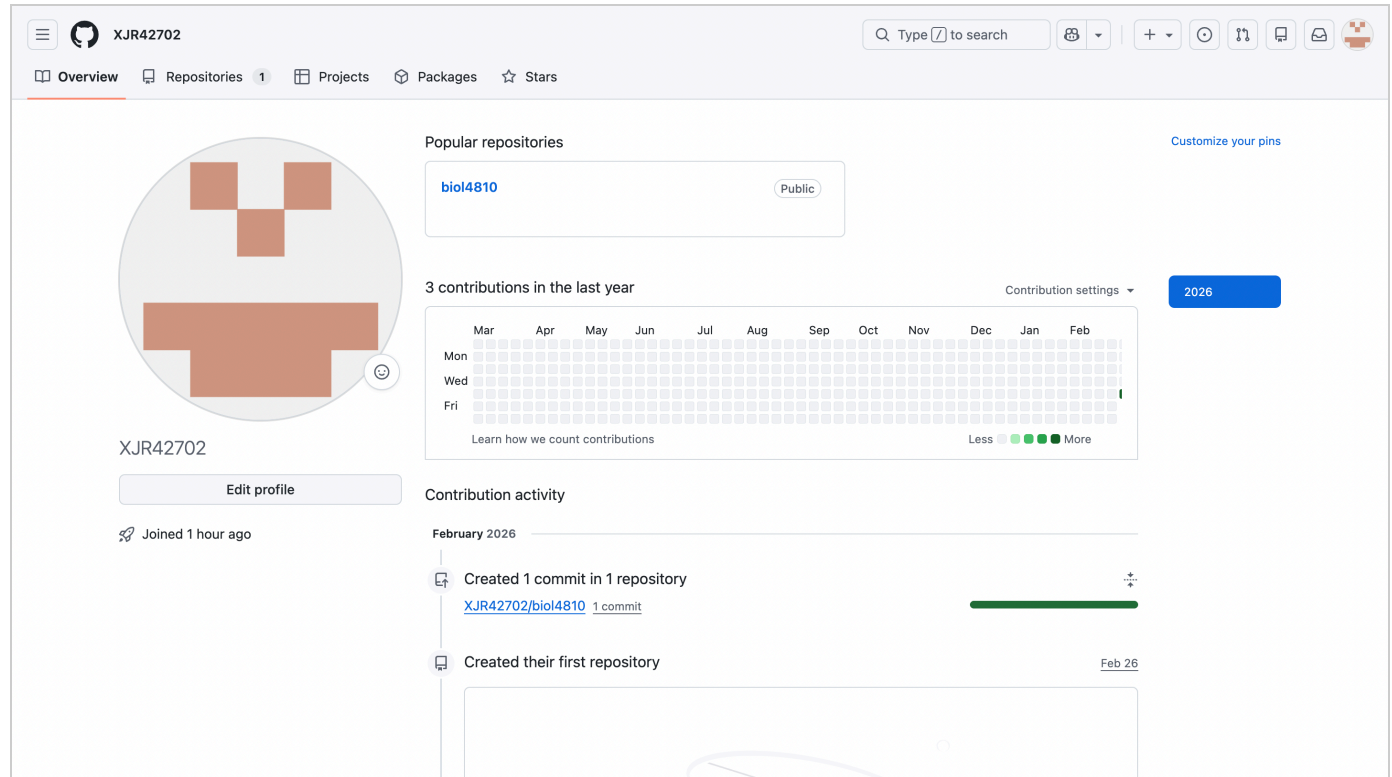

1. Go to <https://github.com> (<https://github.com>)
2. Click **Sign up**
3. Use a professional username
4. Verify your email

Your GitHub username:

XJR42702

Upload screenshot of your GitHub profile page

Choose File Screen Shot...1.19.47 AM

Step 1 — Configure Git Locally

First, check which version of Git you have installed `git --version`

Run:

```
git config --global user.name "Your Name"
git config --global user.email "you@school.edu"
git config --global github.user "yourgithubusername"
git config --global core.autocrlf input

git config --global core.editor "pico -w"
```

Then confirm:

```
git config --global --list
```

Paste output of `git config --global --list`:

```
config --global core.editor "pico -w"
config --global --list
core.editor=pico -w
```

Step 2 — Create and Install SSH Key

A) Check for existing keys

```
ls -al ~/.ssh
```

If you do not see `id_ed25519` and `id_ed25519.pub`, create one.

B) Generate new SSH key

```
ssh-keygen -t ed25519 -C "you@school.edu"
```

Press Enter to accept default location.

Add a passphrase (optional) or press Enter twice to skip.

C) Start ssh-agent and add your key

```
eval "$(ssh-agent -s)"  
ssh-add ~/.ssh/id_ed25519
```

D) Copy your public key

```
cat ~/.ssh/id_ed25519.pub
```

Copy the entire line starting with `ssh-ed25519`.

E) Add key to GitHub

1. GitHub → Settings → SSH and GPG keys
2. Click New SSH key
3. Paste public key
4. Save

F) Test SSH connection

```
ssh -T git@github.com
```

You should see:

Hi USERNAME! You've successfully authenticated...

Paste SSH test output:

```
xochitlramirez@Xochitls-Air-2  
Identity added: /Users/xochitlramirez/.ssh/id_ed25519 (XochitlRamirez02@yahoo.com) xochitlramirez@Xochitls-  
Air-2 ~ % cat ~/.ssh/id_ed25519.pub
```

Upload screenshot showing your SSH key listed in GitHub Screen Shot...1.13.26 AM

SSH keys

[New SSH key](#)

This is a list of SSH keys associated with your account. Remove any keys that you do not recognize.

Authentication keys

SSH

XochitlRamirez02@yahoo.com

SHA256:FueTpXr5pzYkFRIPaQZNqFvI2DIwYeDGPhbE1MMPwBI

Added on Feb 26, 2026

Last used within the last week — Read/write

[Delete](#)

Check out our guide to [connecting to GitHub using SSH keys](#) or troubleshoot [common SSH problems](#).

Step 3 — Initialize Repository in Existing Folder

```
cd ~/biol4810
git init .
```

Step 4 — Create a .gitignore

```
touch .gitignore
```

Add lines such as:

```
*.gz
*.fastq
```

Edit anytime:

```
pico .gitignore
```

Step 5 — Add + Commit

```
git status
git add .
git commit -m "Initial repository setup"
```

Paste output from first commit:

```
xochitlramirez@Xochitls-Air-2 biol4810 % git commit -m "Starting my first repository" [main (root-commit) 2dfa8f1] Starting my first repository
2 files changed, 3 insertions(+) create mode 100644 .gitignore create mode 100644 README.md
```

Step 6 — Create Repository on GitHub

Create a new repository online.

Do NOT initialize with README.

Copy SSH lines and run:

```
git remote add origin git@github.com:USERNAME/REPO.git
git branch -M main
git push -u origin main
```

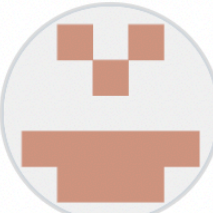

Upload screenshot of GitHub repository page showing your files online

Ongoing Workflow

```
git pull
git status
git add .
git commit -m "Description of update"
git push
```

Reflection

What part was most confusing? What do you feel confident about now?

I think getting used to terminal and a new website is the hardest part but I'm very confident that I'll be able to get the hang of it after playing with it some more.

Git Onboarding Submission

GitHub username: XJR42702

Git config:

```
user.name=Xochitl user.email=XochitlRamirez02@yahoo.com github.user=XJR42702 core.autocrlf=input
config --global user.name "Xochitl"
config --global user.email "XochitlRamirez02@yahoo.com" config --global github.user "XJR42702"
config --global core.autocrlf input
config --global core.editor "pico -w"
config --global --list
core.editor=pico -w
```

SSH test:

```
xochitlramirez@Xochitls-Air-2
Identity added: /Users/xochitlramirez/.ssh/id_ed25519 (XochitlRamirez02@yahoo.com) xochitlramirez@Xochitls-Air-2 ~ % cat ~/.ssh/id_ed25519.pub
ssh-ed25519 AAAAC3NzaC1lZDI1NTE5AAAAIIT0markamBaAowXh5vSIVKLDJGnC2PnnPTmL/NFyLn5 XochitlRamirez02@yahoo.com
```

First commit:

```
xochitlramirez@Xochitls-Air-2 biol4810 % git commit -m "Starting my first repository" [main (root-commit) 2dfa8f1] Starting my first repository
2 files changed, 3 insertions(+) create mode 100644 .gitignore create mode 100644 README.md
```

Reflection:

I think getting used to terminal and a new website is the hardest part but I'm very confident that I'll be able to get the hang of it after playing with it some more.

Profile Screenshot:

The screenshot shows the GitHub profile page for user XJR42702. The profile is relatively new, having been joined 1 hour ago. The user's avatar is a circular profile picture with a pixelated orange and white design. The profile name is XJR42702, and there is an 'Edit profile' button. The 'Overview' tab is selected, showing a search bar, navigation links for Overview, Repositories (1), Projects, Packages, and Stars, and a 'Customize your pins' link. The 'Popular repositories' section features the repository 'biol4810' with a 'Public' label. The '3 contributions in the last year' section displays a calendar grid for the year 2026, with a '2026' button to the right. The 'Contribution activity' section shows a timeline for February 2026, with two entries: 'Created 1 commit in 1 repository' (linking to XJR42702/biol4810) and 'Created their first repository' (dated Feb 26).

SSH Key Screenshot:

The screenshot shows the GitHub 'SSH keys' page. At the top, there is a 'New SSH key' button. Below this, a message states: 'This is a list of SSH keys associated with your account. Remove any keys that you do not recognize.' The section is titled 'Authentication keys'. A single SSH key is listed for the email address 'XochitlRamirez02@yahoo.com'. The key is identified by its SHA256 hash: 'SHA256:FueTpXr5pzYkFRIPaQZNqFvI2DIwYeDGPhbE1MMPwBI'. It was added on February 26, 2026, and is marked as 'Last used within the last week' with a green checkmark. The permissions are listed as 'Read/write'. A 'Delete' button is located to the right of the key details. At the bottom, a link points to a guide for 'connecting to GitHub using SSH keys' or troubleshooting 'common SSH problems'.
